

# Arcane Treasury mod

**Authors:** Alexander12, Tipun

**Artist:** Moteelde

## Introduction

This mod brings 60 new items to Baldur's Gate series of games, placing them into shops, containers and to inventory of enemies.

Most of these items have new unique BAMs, which have been made especially for this mod. There are also several items and BAMs from ICWD-games and one from NWN2.

There are a lot of magical items for mages, that's why mod also slightly changes Robe of Vecna to maintain balance. There is also a new icon for Robe of Vecna. Though mod's items are expensive to buy or difficult to get, insane difficulty level is recommended for balance. I don't like Legacy of Bhaal level, when kobold acts like a dragon, but insane level will do. Other mods which make game more difficult are also welcome. There are also new several non-magical treasures.

## Version 1

**Platforms:** Windows

The modding community for the Infinity Engine has been going strong for more than 10 years now, and is the culmination of thousands of unpaid modding hours by fellow fans of the game.

Modders produce their best work and players get the best, well-supported mods when we all work together.

There are two big ways to upset this harmony. One is to claim someone else's work as your own. The second is to host and redistribute a mod without permission from the author(s).

Be kind to your fellow players and modders. Don't do either.
